

Predict the unpredictable

## PreCrime™ Intelligence for MS Sentinel

Supported by PreCrime Intelligence, Microsoft Sentinel users can now identify and preempt malicious infrastructures weeks before attacks occur. Our behavioral AI goes beyond reactive blocklists to equip your team and security stack and inform appropriate action by delivering 97% unique intelligence versus traditional threat intelligence feeds.

### Why Integrate PreCrime Intelligence with Sentinel?

BforeAI's PreCrime technology is a cybersecurity game-changer. By leveraging behavioral analytics to help users shift from a reactive stance to a preemptive cyber defense model, BforeAI enables security teams to identify and prevent threats before they escalate into full-scale cyberattacks.

### Benefits at-a-Glance

- **Standardized:** Leverages TAXII and STIX standards so information can be easily plugged into existing systems including SIEM, XDR, and SOAR
- **Easy:** Set up in minutes with out-of-the-box correlation
- **Convenient:** Activate today through the Azure Storefront

### BforeAI and Microsoft for Startups Pegasus Program

The Microsoft for Startups Pegasus Program is designed to accelerate the growth of high-potential, enterprise-ready startups. Participants benefit from deep technical enablement, co-selling opportunities with Microsoft's sales teams, and connections to a vast network of partners and customers.

BforeAI is pleased to be a trusted integration partner in the Microsoft ecosystem.
