

## Predictive Attack Intelligence Solution

# PreCrime™ | Intelligence

PreCrime Intelligence is our predictive attack intelligence solution. Our behavioral AI goes beyond reactive blocklists to equip your team with the most extensive dataset of future malicious infrastructure, better arming your security stack to deny malicious traffic in near real-time before they launch attacks.

**100k loFAs**

daily predicted loFAs

**18 days**

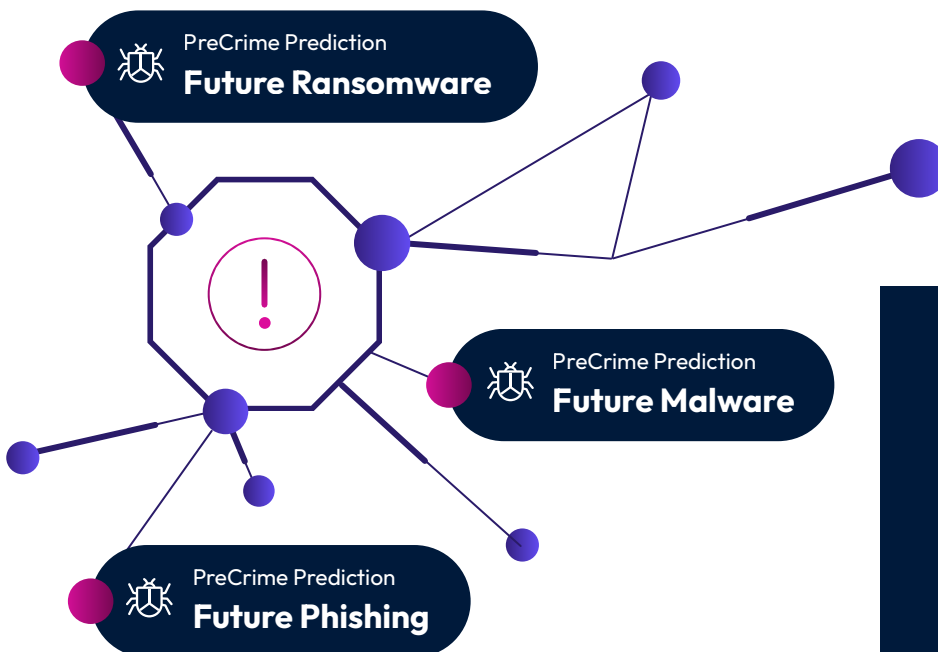

ahead of TI competitors

**0.05%**

false positive rate

## See the future: Empower your security team with unique indicators of future attacks (loFAs)

The exponential growth of network infrastructure has created more attack surfaces than ever before. BforeAI uses predictive threat intelligence (PTI) to proactively monitor for suspicious behaviors and dangerous domains.

**4 million**

malicious behaviors  
mapped

**20 million**

suspicious infrastructures  
monitored 24/7

**MTTR: 0**

predict + preempt,  
don't respond

“Each and every one of these threat blocking events saves a user from being harmed, and we’re pleased to be able to offer the benefits of BforeAI’s predictive threat technology to everyone.”
